We are a few hours away from the Vanadium 101 interactive webinar being held today, Thursday 3 May 2018, 14:00 (SAST); 13:00 (GMT+1). The webinar is hosted by Fortune Mojapelo, CEO of Bushveld Minerals and Mikhail Nikomarov, CEO of Bushveld Energy, and will feature in-depth independent research-based insights on the vanadium market, including:

- What is vanadium and what are the characteristics and resulting applications of vanadium?
- What are the key drivers of demand for vanadium and what is the outlook for these going forward?
- What impact can be expected for vanadium demand from Chinese regulations in the construction industry?
- How real is the energy storage opportunity for vanadium and how big is it?
- How big and how real is the surplus/latent capacity of vanadium slag producing steel plants?
- How sustainable are the current levels of vanadium prices going forward?
- How real are the substitution risks for vanadium in the current vanadium price environment?

This interactive webinar will consist of a presentation and question & answer session and is expected to run for approximately 75 minutes. Please send any questions that you would like answered during the interactive session to [info@bushveldminerals.com](mailto:info@bushveldminerals.com). The presentation material will be accessible from Bushveld Mineral's website during and after the webinar.

Feel free to forward this invitation to anyone you think might be interested in attending the webinar.

Looking forward to hosting you!
